

## Introducing Our New Facility: Weatherford Bulk Plant

### Weatherford, OK Bulk Plant

NexTier’s new cement bulk plant in Weatherford, OK marks our first bulk plant in the Mid-Con region, enhancing NexTier’s ability to meet customer needs more effectively. This facility features:

- 30,000 cubic feet of storage capacity
- 600 cubic feet of blend train capacity

### Field Cement Storage and Auxiliary Equipment

To ensure the plant is fully equipped for every cementing need, a variety of cement storage and support equipment is available for quick and efficient service.

Laydown/Field Bins	8
Bulk Trucks (500 cubic feet)	14
Portable Silos (750 cubic feet)	8
Boost Pumps	3
Batch Mixers (50 bbls and 100 bbls)	2

*Additional equipment can be promptly dispatched from other NexTier facilities as needed.*

### Laboratory Equipment and Testing Capabilities

The Weatherford bulk plant includes in-basin lab and engineering support to ensure tailored solutions for optimizing the life of your well. Our lab features:

- HPHT Consistometers
- Ultra-Sonic Cement Analyzers
- Fluid Loss Apparatus
- Fann 35’s

### Cement Pumps

Our fleet includes our 1,000 HHP double cement pumps and if the wellbore requires, our new 1,500 HHP NEXera cement pumps built for reliable deployment and execution at the wellsite.
